

CONSTRUCTION/RENOVATION MATERIALS

Waldwick's garbage and recycling collection are an essential service program and it has been designed to benefit taxpayers in an efficient and equitable manner. It is structured to provide collection of the usual daily household garbage and recyclable materials that are generated by everyone. It is unfair to burden the taxpayer with costs for collection and disposal of materials generated by renovations or construction. It is the responsibility of the homeowner to contract with a hauler or their contractor for the removal of construction/demolition or renovation materials.

The following items **WILL NOT** be picked up by the Borough's hauler at the curb with household garbage:

- Asphalt/asphalt based roofing scrap
- Building/Construction materials (windows, doors, paneling, bathtubs, hot tubs, toilets, sinks, cabinets, wall/floor tile, lumber, etc.)
- Dirt
- Liquids
- Oil
- Paints/thinners
- Plastic fencing
- Roofing materials
- Stone/rock/concrete/brick
- Wood
- Wooden pallets of any kind
