

**NOTICE OF CONSTRUCTION ACTIVITIES**

**TO ALL RESIDENTS – MALCOM ST, DUNCAN ST**

**WALDWICK WATER TREATMENT IMPROVEMENTS PROJECT  
BOROUGH OF WALDWICK  
BERGEN COUNTY, NEW JERSEY  
OUR FILE NO. WA-1417A**

Construction recently began in your neighborhood for the Waldwick Water Treatment Improvements project. Construction of upgrades and improvements to the Waldwick Water Treatment Systems were financed by the New Jersey Water Bank (NJWB). Work on this project will include the installation of dual Ion Exchange Treatment Systems at essential water production wells within the Borough of Waldwick.

This project will benefit the community by upgrading the existing treatment facilities to comply with current NJDEP PFAS drinking water regulations. This will allow the Department to continue to provide safe drinking water to all residents in the Waldwick Water Department service area.

This project will also include the installation of a water main from Waldwick Well #5 (located NE of HCA Park) to Waldwick Well #4 (located in the SE corner of Malcom St). The water main is to be installed east of Malcom Street and Duncan Street, between Malcom Street/Duncan Street and the Saddle River.

**The water main installation and major construction is planned to start on or about February 22, 2024 and is scheduled to finish in 4-6 weeks. This timeline is weather dependent and any major changes in that timeline will be communicated to you as efficiently as possible. No service interruptions are expected as part of this project.**

*For additional information on PFAS and progress reports regarding this project, please visit the Waldwick Water Department website at [www.waldwicknj.org/pfas](http://www.waldwicknj.org/pfas) or contact the Borough Administrator's Office at 201-652-5300 ext. 227.*

We apologize for any inconvenience you may be experiencing due to the construction activities and appreciate your cooperation.
